RESPONSIBILITY

	Employers should continue to play the major role in providing health insurance for their employees.	Health insurance should be a personal responsibility like automobile insurance.	Health insurance should be a shared responsibility of individuals, employers and government	Health care is a community responsibility for public safety, like the fire department, or police.	Health insurance should be paid for by tax dollars and managed by local, state or federal government.

QUALITY, TRANSPARENCY AND ACCOUNTABILITY

	Health care services should stress preventing disease rather than relying on high technology cures.	We need the same kind of public reporting and accountability in health care that we have in public companies, such as water and power companies, so we know where the money comes from, how the money is spent, and why.	There should be one organization that oversees all our nation's health care and evaluates the effectiveness of all health care services, rather than having the numerous agencies that now exist.	We need to have uniform standards and guidelines that health care professionals can use to make sure we receive the most effective care.	Health care professionals should be required to give patients information about the costs and benefits of treatments and services so people can make good choices.
